

■ Weekly Investment-Migration Intel — 2026-05-17

Window: last 1 days · 12 countries scanned · 20 signals · 0 proposed updates

How to use: tick a checkbox → save → the [intel-apply](#) workflow PATCHes

Notion + [data/_payload.json](#) for that field. Untick to revert is not automatic — use the next cycle.

No high-confidence price changes detected this week

The scan ran (signals shown below per country) but nothing crossed the 2-source × ≥5% drift threshold. Tick the "**Force review**" boxes for any country where you want to investigate manually.

How responses are applied

1. Tick boxes for changes you accept.
2. The [intel-apply](#) workflow fires on issue edit, parses the trailers, and PATCHes Notion + [data/_payload.json](#).
3. The 10-min [pull-notion](#) job then propagates to WordPress.
4. Untick = no-op (no revert). Open a new issue if you need to roll back.
